

## 144,000: 40 – Illumine 12,000 Lights

Here is the cosmic formula for our illumination and enlightenment, and for awakening all children of God on Earth:

- All of light is incorporated in the cerebrum, which has approximately 144 billion cells or “light bulbs” that are capable of shining with varying amounts of Christ illumination.
- These cerebral cells and their circuitry consist of 12 separate yet interconnecting thrones or power centers, one for each of our God-given 12 powers such as understanding.
- Each center contains about 12 billion cells, of which only 12,000 need to be illumined with Christ light that radiates into, and enlightens, the entire power throne.
- When 12,000 cells in 12 centers (144,000 bulbs) light up, they illumine all 144 billion cerebral cells. Like Buddha, we are enlightened. Like Jesus, we light up the world.

Our power of understanding expresses principally via our 5 physical senses and our analysis of the data that they gather. In the cerebrum, all 5 senses have well-defined, primary locations wherein the sensory information first registers, plus adjoining association areas where this data is analyzed and understood. Below are the Brodmann’s areas for each sense:

Vision: primary 17; association 18, 19

Touch: primary 1, 2, 3; association 5

Hearing: primary 41, 42; association 22

Taste: 43

Smell: 28 (not shown)

Analysis, association & comprehension of combined sensory data take place in association areas 39, 40

Note that most of the back part of the cerebrum is devoted to our power of understanding and its involvement with our 5 senses and our analytic functions. This allows us to function in the world, even as we understand that we are not of it but rather are here to enlighten it.

**Visualization:** Be still and focus on the minimum 12,000 cells that are spread throughout all of your cerebral sense centers. Call upon our Cosmic Electrician to illumine all of these 12,000 “light bulbs.” Know that this will not happen all at once, or you would be overwhelmed and blinded in the light, much as Saul was blinded on the road to Damascus when he saw the light and heard the voice of Christ Jesus. Rather, have faith that your enlightenment will take place in a slow, gradual, systematic, cell-by-cell progression.

Imagine the light of illumination shining throughout your cerebral understanding throne. Look closely and see that it is a **cream yellow to a pale orange color**. This light is not sharp or overwhelming, but rather subtle and sustaining and gently stimulating. In its hues, you have the eyes to see, the ears to hear, and the loving touch to heal.

Let your light shine on the 144,000 elect, whose combined light awakens a sleeping humanity.
